# ABOUT US

## We Speak Your Language

Our extensive expertise in Digital & Technology Law means you spend less time educating us about your case and we spend more time solving it. Our fluency helps us form close working relationships with your team, often feeling like in-house counsel.

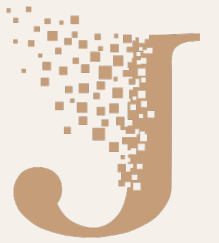

### We transform complexity into advantage!

With our outside of box thinking, we shape powerful legal strategies that move your business forward. We solve your most critical multidimensional challenges with hands on solutions that will provide clarity and confidence in your chosen path. With our strategic consultive approach we craft the tailor-made strategies you need.

Our clients include some of the largest financial institutions, leading technology companies. Whether established for decades or just an entrepreneur's idea, we represent organizations as they grow, innovate, disrupt, and develop into leading industry players.

# OUR SERVICES

## Data Protection

As the type and number of regulations governing privacy increases, so do the risks of gathering and storing customer data. We can help you to assess those risks and craft a privacy policy designed to avoid exposure. To this we are specialized on designing tailor-made data privacy solutions on local and global level as well as to support with its implementation.

## Artificial Intelligence

Artificial intelligence (AI) legal services encompass a range of specialized expertise tailored to businesses venturing into AI technologies. Our team offers comprehensive legal counsel on AI-related matters, ensuring compliance with evolving regulations and industry standards. We provide guidance on navigating the complex legal landscape surrounding AI innovations.

## Fintech & Blockchain & Metaverse & Web3 Gaming

Our expertise lies in offering legal guidance on regulatory affairs, ensuring compliance with industry-specific norms and governmental directives, including those stipulated by the Swiss Financial Market Supervisory Authority (FINMA). Let us assist you in navigating the intricate regulatory framework effectively.

## Contracts

We craft terms and conditions, privacy policies and other key website agreements for web2 as well as for web3 companies. We also conduct contract general reviews tailored to our clients' needs.

Cloud computing and software as a service (SaaS) deals are becoming more common. With SaaS deals, the focus is less on licensing and more on the service agreement, specifically the Service Level Agreement (SLA) that covers topics like uptime requirements, speed, and responsiveness.

# OUR COMPETITIVE EDGE

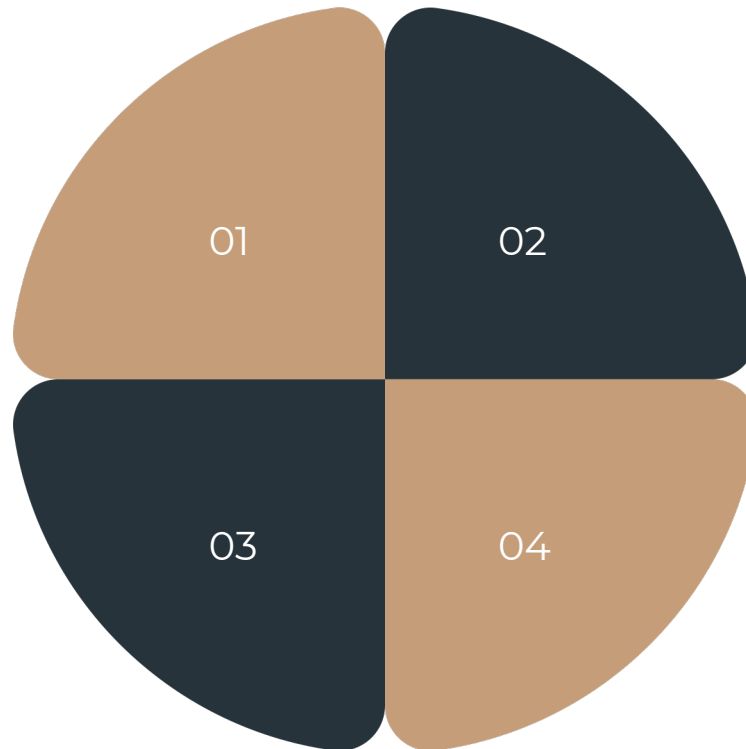

We transform complexity into advantage!

## Bold & Modern

We are fearless and inquisitive, challenging ourselves to think big and find creative new solutions.

## Reliable

We take ownership and let you focus on building your business.

## Flexible

We tailor solutions to your needs. Whether it's adjusting timelines, accommodating budget constraints, or customizing strategies, we are committed to finding flexible solutions that work best for you.

## Result Oriented

We don't just offer legal advice; we provide strategic guidance aimed at achieving your objectives.
